SPIDS
experience
Tuwaiq Mountain
2024
International Conference & Exhibition

SPIDS Week 2024

Welcome message

IN his second appearance in the second day of the Future Investment Initiative in Riyadh, Saudi Arabia's Crown Prince Mohammad bin Salman likened the Saudi people' strength to that of the formidable Mountain of Tuwaiq, north of the Kingdom. **Saudi Crown Prince said: "The Saudis' strength is like that of the Tuwaiq mountain, unbreakable, unless this mountain is leveled and equaled to the ground."**

SPIDS Week 2024 strength as international conference addressing all aspects of infectious diseases based on evidence based and Clinical Practice Guidelines with this year theme (Clinical Practice Guidelines Can Trust)

IT is my great pleasure to welcome you to this international conference which will bring together local, regional, and international experts in the field of Pediatric Infectious Diseases who are going to discuss the hot topics in Pediatric Infectious Diseases and focus on the current issues and controversies in the field. SPIDS Week 2024 shows how clinical practice guidelines in infectious diseases can enhance clinician and patient decision-making by translating complex scientific research findings into recommendations for clinical practice that are relevant to the individual patient encounter, instead of implementing a one size fits all approach to patient care. The event is well-known to feature keynote lectures, debates, research presentation, networking functions, and much more, all in an interactive and engaging environment. Our goal is to deliver a powerful, memorable, and rich learning experience based on science to save live.

Book your seat today. We hope to see you all at Marriott Hotel, Riyadh in September 2024.

Let's inspire the world

Dr. Rana Almaghrabi
SPIDS president 2024

Key Benefits of attending :

- Learn from regional and international experts in Pediatric Infectious Diseases
- Review current issues, gain new insights, knowledge, and comprehension of various Pediatric Infectious Diseases topics.
- Identify how to approach key issues, matters and common problem encountered in your daily practice.
- Stay current and recognize the contemporary and ongoing issues in the field.
- Share you experience, address your questions, and deliver your opinion.
- Obtain CME points by attending this conference.
- Collaborate and find work opportunities with people in the field.
- Network and build relationships with key experts in the healthcare industry.

Who should attend :

- Infectious Diseases specialists and trainees.
- Infection Control Specialists and providers.
- Pediatricians and Pediatric trainees.
- Family Medicine physicians and General Practitioners.
- Clinical Pharmacists.
- Microbiologists.

Dr. Rana Al Maghrabi
